All trusts require regular reviews to ensure that they are up to date, both in relation to your family's circumstances and needs, as well as in relation to legal changes resulting from judgments handed down by our courts and changes to the tax treatment of trusts by the South African Revenue Service. In addition, the vast majority of trusts in South Africa are not administered correctly leaving them at risk of being attacked as invalid. Such an attack, if successful, can leave your family's assets vulnerable to creditors and result in punitive tax consequences.
