

Fortunate Global Growth Portfolio

As of 2025/07/31

Investment Objective

The primary aim of the Fortunate Global Equity Portfolio is to achieve long-term capital growth within the global equity landscape, catering specifically to investors comfortable with higher risk levels. This portfolio predominantly consists of equities and holds a flexible mandate to invest across diverse regions and currencies. Comprising a selection of individual stocks rather than a unit trust, it offers investors exposure to a globally diversified portfolio tailored to their risk-adjusted preferences.

Given its actively managed nature, this portfolio's risk and return objectives are subject to variation. It dynamically reallocates assets across international markets in response to evolving economic and market conditions, aiming to maximize overall returns. Moreover, the portfolio might include participatory interests or engage in other forms of participation within collective investment schemes or similar setups.

Please Note: The Information regarding fund set up and performance has been backdated. The Fortunate Global Equity Portfolio will only become active in December 2023.

In the event that specific collective investment schemes in securities (unit trusts) are mentioned please refer to the relevant fact sheet in order to obtain all the necessary information in regard to that unit trust.

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the company/scheme. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used.
