### **Holdings**

**Investment Objective** 

The Fortunate Stable Portfolio is set up to provide capital preservation and absolute returns through active low equity allocation. The aim is to limit drawdowns but to achieve returns which exceeds inflation plus 3% over the medium term. The portfolio aims to achieve this with low volatility and diversification in different asset classes.

The fund selection objective is a quality approach, seeking to deliver constant performance through different business cycle.

In the event that specific collective investment schemes in securities (unit trusts) are mentioned please refer to the relevant fact sheet in order to obtain all the necessary information in regard to that unit trust

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the company/scheme. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used.
