Investment Objective

The Fortunate Discovery Balanced Portfolio is set up to provide investors the opportunity for higher risk longer-term growth through diversification of different asset classes. The portfolio is set in accordance with Regulation 28 which allows for a maximum of only 45% of the Fund to be invested abroad.

The investment objective of the Portfolio is to obtain long term capital growth at moderate risk levels. The investment objective will be achieved by a diversified spread of investments similar to that usually employed by retirement funds. The Fund will invest in in a range of equities, bonds, money market instruments, fixed interest securities or property.

In the event that specific collective investment schemes in securities (unit trusts) are mentioned please refer to the relevant fact sheet in order to obtain all the necessary information in regard to that unit trust.

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the company/scheme. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used.
